To the City Councils of Danville, San Ramon, Dublin, Plesanton and Livermore:

You are being asked to advance \$25.8 million to Valley Link, a grossly over-priced project that has yet to receive any committed funding from San Joaquin County. No matter how persistent its sponsors, a \$3 billion plus rail line line with a projected average speed of 36.5 mph that is expected to attract at most 16,500 round- trip patrons per weekday by 2040, simply doesn't wash.

The residents of your cities would be much better served by fast and convenient bus-only lanes along highways I-580 and I-680.
